Bharat Singh

MERN Stack developer

WORK EXPERIENCE

DevTechnosys, Jaipur, Rajasthan

MERN Stack Developer   06/2023 – Present
- Innovative real-time projects and dynamic admin dashboards were developed using the MERN stack and AWS features to enhance project optimization and security.

Haxxa, Malmo, SE

FullStack Developer and Devops   11/2021 – 06/2023
- Useful features were developed and polished for organizations that serve a people on a daily basis.

RIWebSoft, Rewari, Haryana

Fullstack Developer   08/2020 – 03/2021
- Improved quality and functionality of different innovative projects by implementing useful features.

PROJECTS

Escapely Team Building (Puzzle Game) 👓
- Worked on a fun escape room game where people work together to solve puzzles. Using cool technology like **Socket.io, Node.js, and React**, I made it so teams can play together in real-time. Players can draw together on a shared sketchpad and get hints instantly

Messenger Bot 👓
- **NodeJS** Chat bot for **Facebook messenger** helps users with tasks, reverses images, and identifies songs from music voice messages. It also offers various other features to enrich the messaging experience.

Ezyshop 👓
- EzyShop is a convenient mobile ecommerce with secure **Paypal payment integration**, **Sendgrid** email verification, and a session cart feature for easy management of purchases.

Filtercopy 👓
- A user-friendly platform that utilizes API technology to apply high-quality image filters, improving your image with just one click.

Entaxis 👓
- Website for Services refer to the activities or tasks that are provided by companies or individuals for the benefit of their customers. Many businesses offer a wide range of services to their clients, including consulting, marketing, legal advice, financial planning, and customer support.
